The 1st one was a Spam-Firewall, and I purchased it on 2/27/2010. It would not install correctly, so I emailed webhost support, they explained they would send me the program and it would be installed for me. They did it, but it was corrupted and could not run. Since it was corrupted, I had to purchase the 3rd version on 3/10/2010. The 3rd version was also corrupt and did not work. On 4/22/2010, I purchased the 4th version. I didn't receive the email with the download link to the 4th version. I emailed the support and they explained they would be sending me the 4th version by email, but they never did. This isn't the first time this has happened. I am hoping for a refund for the 1st and 2nd versions and also for the 4th version because it wasn't even delivered to me. They were aware of these issues, but they did not offer a refund or even offer the un-corrupt versions for download. My rep is not someone I would trust to download it for me. I will not purchase anything from here again. This software tool was easy to use and needed no instructions. I successfully recovered all my email passwords and some more in about 10 minutes. First I just tried to install it on my girlfriend's computer. I installed it and activated it. A few minutes later she was doing the same as me
